Heavy Nose Paper Airplane

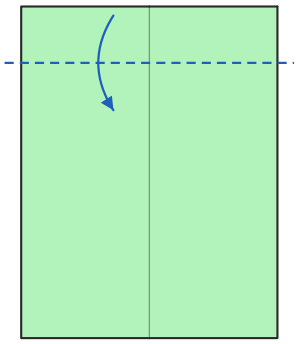

Step-by-step folding instructions

1

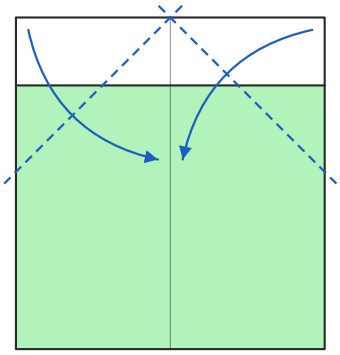

1. Use a sheet of printer paper. Fold it in half the long way, then unfold.

2

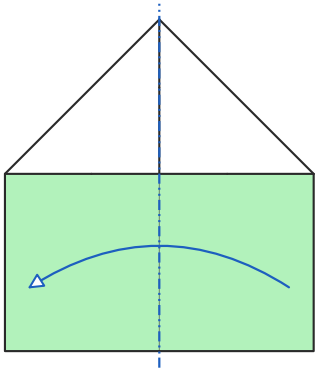

2. Fold the top edge down to make a wide strip.

3

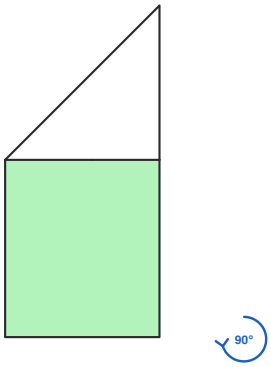

3. Fold the top corners in to the centre crease.

4

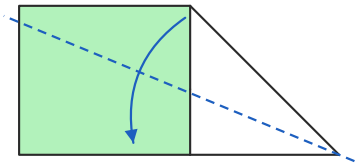

4. Fold the plane in half behind, along the centre crease.

5

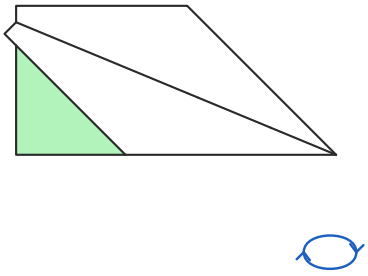

5. Turn the plane on its side, nose to the right.

6

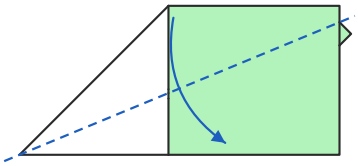

6. Fold the top layer down so its top edge meets the bottom edge. This is the first wing.

7

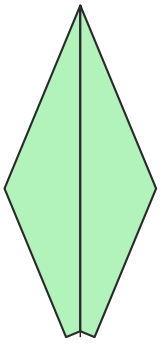

7. Turn the paper over.

8

8. Fold the second wing down the same way.

Seen from above, wings open

Done. Open the wings so they sit flat. The folded nose makes it fly straight and survive crashes.
