Origami Bat

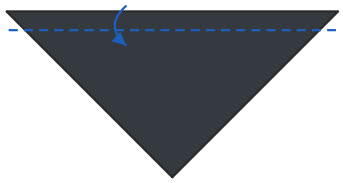

Step-by-step folding instructions

1

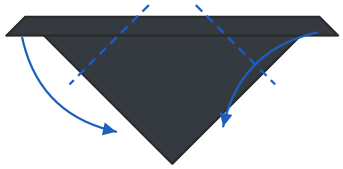

1. Use black paper, turned like a diamond. Fold the top corner down to the bottom corner.

2

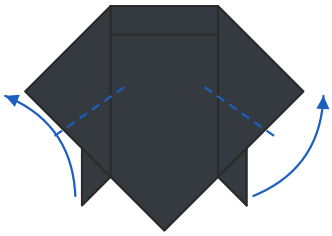

2. Fold the top edge down a little, about 1.5 cm on a 15 cm square.

3

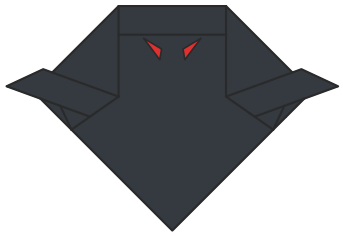

3. Fold both wings down, on slanted lines that start on the top edge, so the wings hang straight down.

4

4. Fold both wings back up and out, so they point to the sides.

Done. Draw two eyes. If you like, cut a wavy edge along the bottom of each wing. Your bat is done.
