Origami Teddy Bear

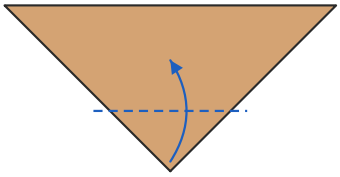

Step-by-step folding instructions

1

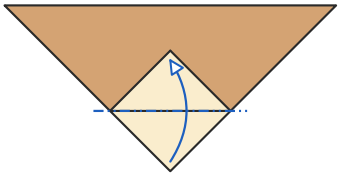

1. Start with the white side up, turned like a diamond. Fold the top corner down to the bottom corner.

2

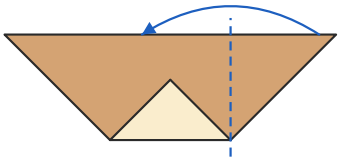

2. Fold the bottom point of the front layer up. This is the muzzle.

3

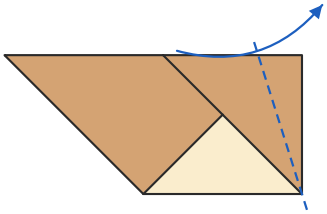

3. Fold the bottom point that is left behind.

4

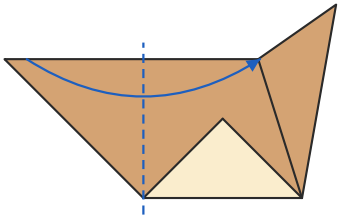

4. Fold the right corner in, so the side of the face is straight.

5

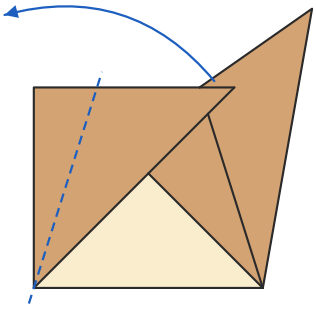

5. Fold the same flap up and out, so its point sticks up above the head. This is an ear.

6

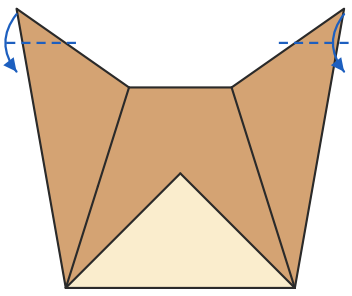

6. Fold the left corner in the same way.

7

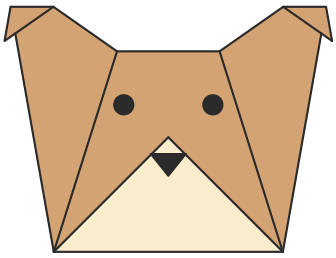

7. Fold it up and out to make the other ear.

8

8. Fold the tips of the ears down.

Done. Draw the eyes and nose. Your teddy bear is done.
