# Origami Finger Claws

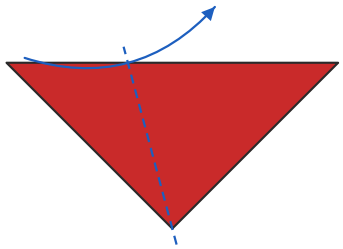

Step-by-step folding instructions

1

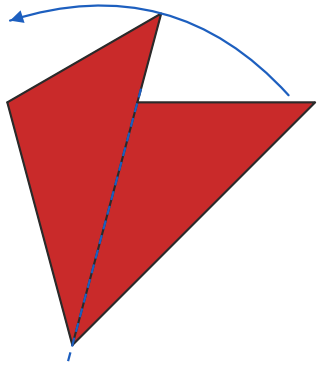

**1.** Use a small square, about 7.5 cm (3 inches). Start with the white side up, turned like a diamond. Fold the top corner down to the bottom corner.

2

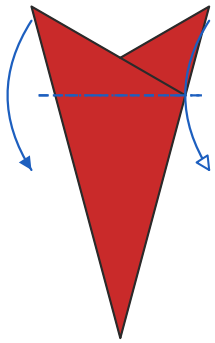

**2.** Fold the left corner across, on a line from the bottom point, so it covers a third of the triangle.

3

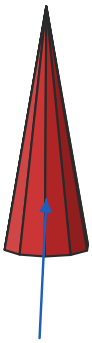

**3.** Fold the right corner across over it the same way. You now have a narrow cone.

4

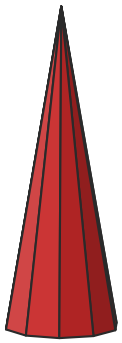

**4.** Fold the top point of the front flap down, and fold the other point behind. Tuck them in so the cone stays closed.

5

**5.** Push a fingertip into the wide, open end to round the cone. Make one for each finger.

**Done.** Your finger claws are done. Make ten in different colours for a full set.
