Origami Mouse Head

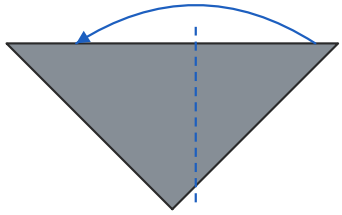

Step-by-step folding instructions

1

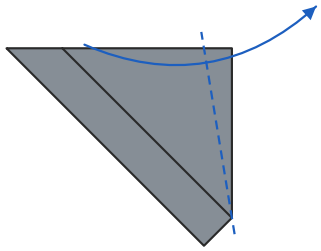

1. Start turned like a diamond. Fold the top corner down to the bottom corner.

2

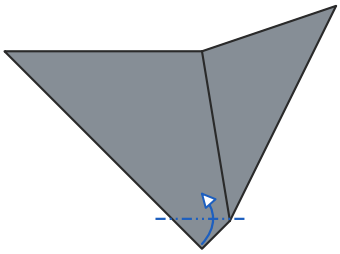

2. Fold the right corner over to the left, on a line a little right of the middle.

3

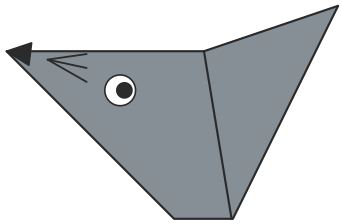

3. Fold the same flap back up and to the right, so its point sticks out above the top edge. This is the ear.

4

4. Fold the bottom point behind.

Done. Draw the eye, colour the nose and add some whiskers. Your mouse is done.
