Origami Shield

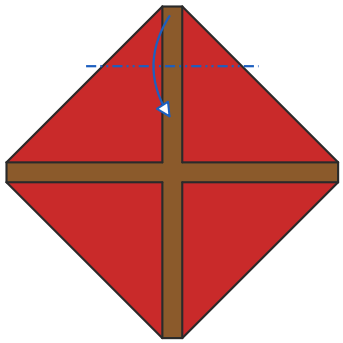

Step-by-step folding instructions

1

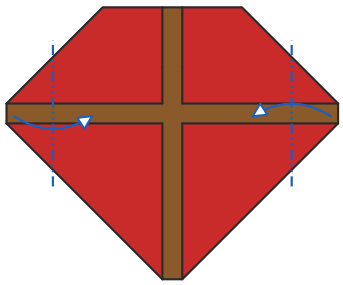

1. Start with the side you want for the cross facing up. Fold each corner in towards the centre, stopping a little short so thin gaps are left between the flaps. The gaps make the cross.

2

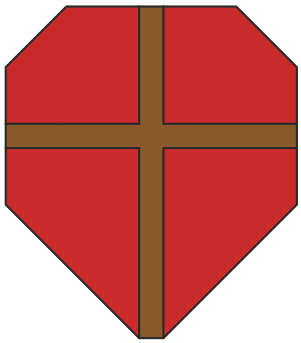

2. Fold the top point behind.

3

3. Fold the side points behind to shape the shield.

Done. Your shield is done. Fold a few in different colours for a knight's set.
