# Origami Sunflower

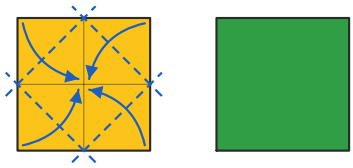

Step-by-step folding instructions

1

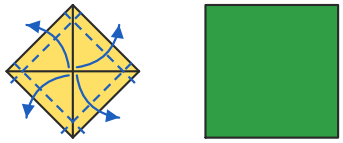

**1.** You need a yellow square for the flower and a green one for the stem. Fold the yellow one in half both ways, then unfold.

2

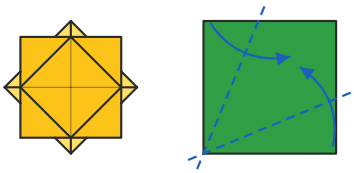

**2.** Fold all four corners to the centre.

3

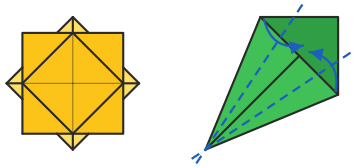

**3.** Fold the point of each flap back out, so it sticks out past the edge. These are the petals.

4

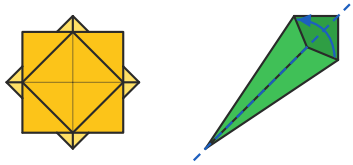

**4.** For the stem, fold two edges of the green square to its diagonal, like a kite.

5

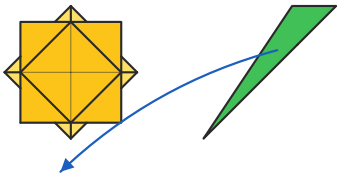

**5.** Fold the same edges to the diagonal again to make it thinner.

6

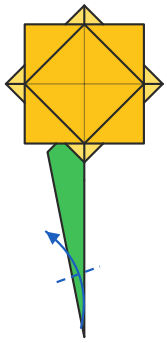

**6.** Fold the stem in half along the diagonal.

7

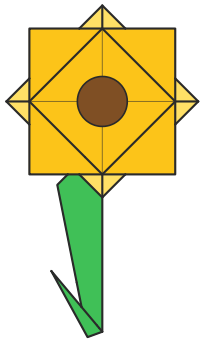

**7.** Stand the stem up and slide its top under the flower.

8

**8.** Fold the bottom of the stem up and out to the side to make a leaf.

**Done.** Colour the middle brown if you like. Your sunflower is done.
