Origami Tulip

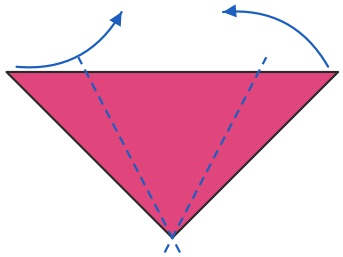

Step-by-step folding instructions

1

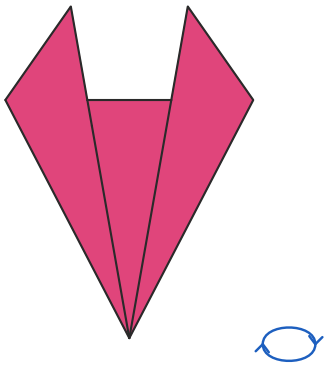

1. Start with the white side up, turned like a diamond. Fold the top corner down to the bottom corner.

2

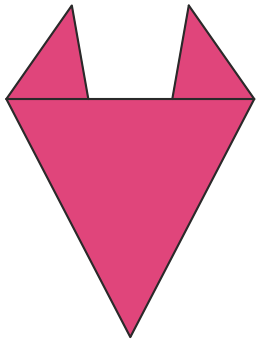

2. Fold the left and right corners up so they point above the top edge. These are the petals.

3

3. Turn the paper over.

Done. Your tulip flower is done. Fold a green square into a stem, or glue it to a paper straw.
