# Origami Turtle

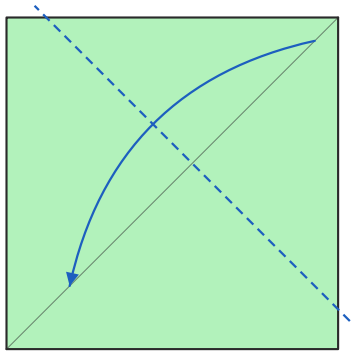

Step-by-step folding instructions

1

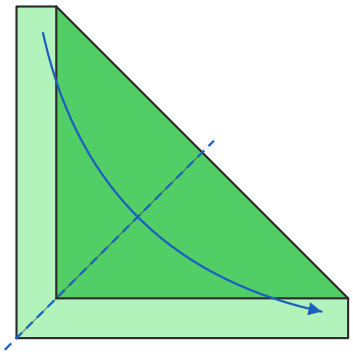

**1.** Start with the white side up. Fold in half corner to corner, then unfold.

2

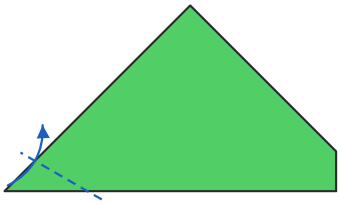

**2.** Fold the top right corner down toward the bottom left corner, stopping a little short so a border shows.

3

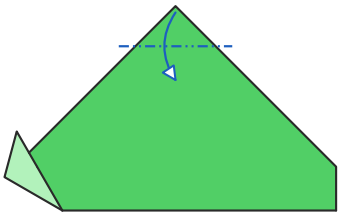

**3.** Fold in half along the diagonal crease, bringing the top left half down onto the bottom right half.

4

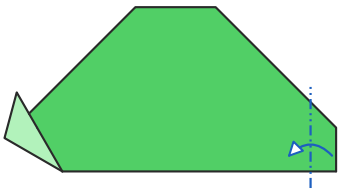

**4.** Outside reverse fold the left point up to make the head.

5

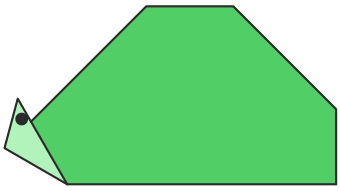

**5.** Fold the top point behind to flatten the top of the shell.

6

**6.** Fold the back end behind to make the tail end square.

**Done.** Draw an eye and a pattern on the shell. Your turtle is done.
