Paper Helicopter

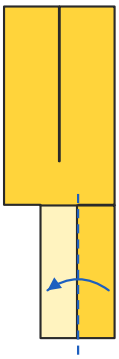

Step-by-step folding instructions

1

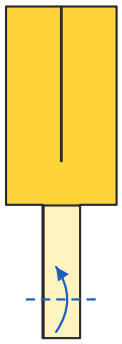

1. Print the template and cut along the solid lines: down the middle of the top, and in from each side. Then fold the left side in.

2

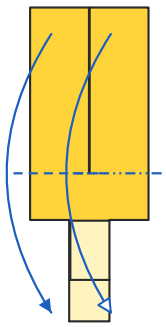

2. Fold the right side in over it.

3

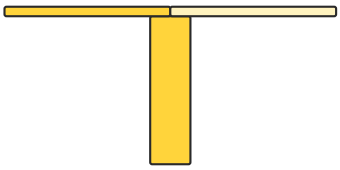

3. Fold the bottom up. Add a paper clip here to give it weight.

4

4. Fold one blade toward you and the other blade away from you.

Seen from the side, blades open

Done. Open the blades so they stick out to each side, like a T. Hold it up high and let go: it spins as it falls.
