Square Paper Airplane

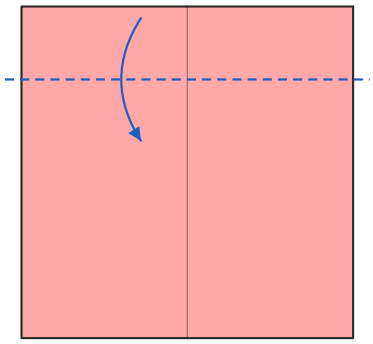

Step-by-step folding instructions

1

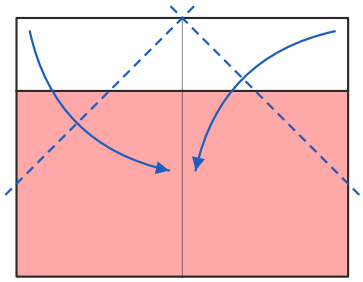

1. Use one square of paper (origami paper works well). Fold it in half, then unfold.

2

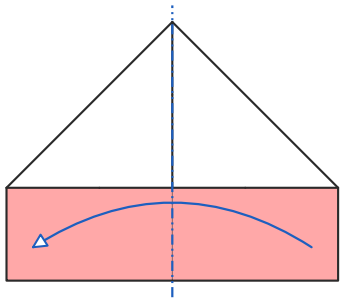

2. Fold the top edge down to make a strip.

3

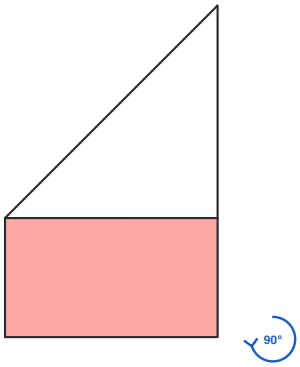

3. Fold the top corners in to the centre crease.

4

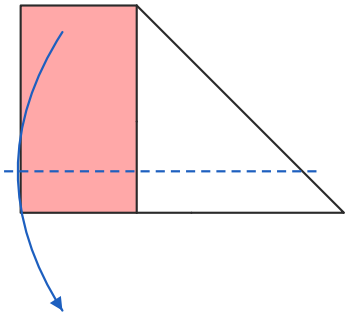

4. Fold the plane in half behind, along the centre crease.

5

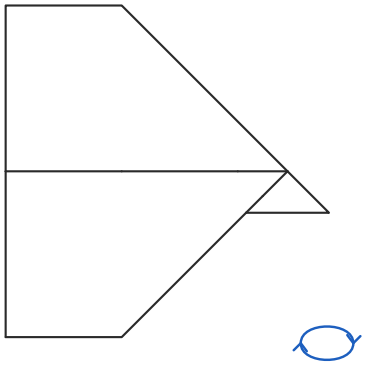

5. Turn the plane on its side, nose to the right.

6

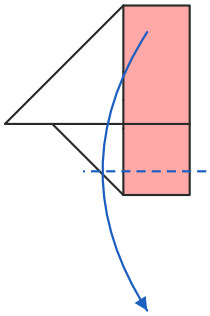

6. Fold the top layer down along a line near the bottom edge. This is the first wing.

7

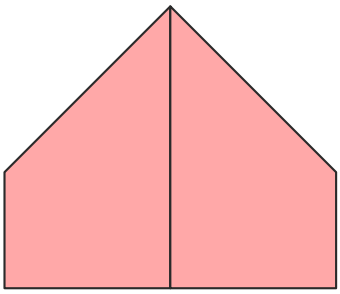

7. Turn the paper over.

8

8. Fold the second wing down the same way.

Seen from above, wings open

Done. Open the wings so they sit flat and level. Launch it gently: square planes glide slowly.
